

Master Morphix Cube Solution

Steps to Solve

1st Make plus using the edge pieces

Adjust the center pieces near the already adjusted edge pieces

Sub steps

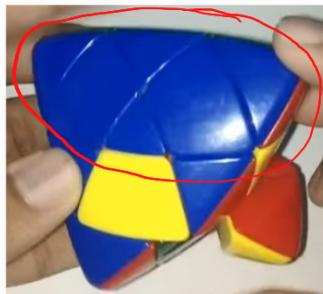

Keep on testing
→ if our edge piece fits the center piece by rotating edge piece and reattaching the adjusted piece

Final result

③ Adjust all the near by edge pieces by using $R'D'R'D$

Conratulation 1st layer done

④

The process to make the 2nd layer is same as
3x3x3 Rubik cube

Tip :- just move the matching side away
as shown in pic

Conratulation 2nd layer is done

⑤ Time to make the plus. (Sad part plus does not look like plus)

Formula $FRUR'U'F'$

Places where we apply $FRUR'U'F'$

or

another L

or

line

where we have to stop

or

or

only one side
matches with
center

- ⑥ We now need to adjust + for that we use
 $RUR'URUUR'$

We need to keep on
trying formula
until we get

Tip:- using formula we just rotate as follows

- ⑦ Now we need to fix top level corners using
 $URU'L'UR'U'L$

- ⑧ Now you need to use $R'D'R D$

Tip:- incase if you are not able to solve then use
 $R'D'R D$ over

Congo U Solve IT !
